¹ Live births only, prior to 1939.

The 'Multiple births' columns show the number of multiple birth events rather than the number of babies born. The 'live births' columns show the number of babies.

² The Still-Birth (Definition) Act 1992 re-defined stillbirths, from 1 October 1992, to include losses between 24 and 27 weeks gestation.

³ Rate per 1,000 population (2010 rates based on 2009 mid-year population estimates).

⁴ Rate per 1,000 live and still births.

⁵ Rate per 1,000 live births.

A few corrections have been made since the initial publication of this table. First, a large percentage change was made to the number of Civil Partnerships Dissolved for 2010. Second, some small percentage changes have been made to the Divorces figures for 1985 to 2008 (and the corresponding 5-year averages), after it was realised that, due to an oversight, neither this nor the version of the table published in March 2010 had been updated to take account of the revision of the historical series of Divorce figures in August 2009. These corrections have not affected any other parts of this table. Previously-published versions of this table should not be used.

Stillbirths ²		Infant deaths		Deaths						Marriages		Divorces ⁶		Civil Partnerships ⁷		Year

⁶ The 2010 divorce figure was produced from data provided by the Scottish Court Service. Figures for 1985

onwards have been revised from those published in previous editions of this table.

⁷ The Civil Partnership Act 2004 came into effect in December 2005.

⁸ Provisional.
