***Life Expectancy for Administrative Areas  
within Scotland, 2006-2008***

Published on 24 September 2009

---

A National Statistics publication for Scotland

National Statistics are produced to high professional standards set out in the National Statistics Code of Practice. They undergo regular quality assurance reviews to ensure that they meet customer needs. They are produced free from any political interference.

Figure 8c	Percentage change in life expectancy at birth between 1996-1998 and 2006-2008, NHS Board areas, Males and Females .....	17

## **Main Points**

### **The key points in this report for 2006-2008 are:**

#### **At Birth:**

- Life expectancy at birth for Scotland was 75.0 years for men and 79.9 years for women;
- Life Expectancy varied considerably across Scotland. The Council area with the highest life expectancy for men and women was East Dunbartonshire (78.0 years and 82.5 years respectively) this was 7.3 years more for men and 5.3 years more for women than Glasgow City which had the lowest life expectancy for both genders;
- For men, the NHS Board area with the highest life expectancy was Borders (77.1 years), for women life expectancy was highest in Shetland (81.5 years);
- The NHS Board area with the lowest life expectancy for both men and women was Greater Glasgow & Clyde (72.7 and 78.6 years respectively).

#### **At age 65:**

- Life expectancy at age 65 for Scotland was 16.3 years for men and 18.9 years for women;
- The Council area with the highest life expectancy at age 65 for men and women was Shetland (17.9 years and 20.4 years respectively), 4.1 years for men and 3.0 years for women more than Glasgow City, which had the lowest life expectancy for both genders;
- The NHS Board area with the highest life expectancy at age 65 for men and women was Shetland (17.9 years and 20.4 years respectively); and NHS Greater Glasgow & Clyde had the lowest life expectancy at age 65 for men and women (15.0 years and 18.1 years respectively).

#### **Compared with 10 years ago in 1996-1998:**

- Life expectancy at birth for Scotland has increased by 2.6 years for men (from 72.4 years to 75.0 years) and 1.9 years for women (from 78.1 years to 79.9 years);
- The gap between men and women continues to close, dropping from 5.6 years to 4.9 years over the period;
- Although some areas had only very small increases in life expectancy over the 10 year period, there were no areas (Council or NHS Board area) that experienced a decrease in life expectancy;
- For men, the gap between the Council area with the highest life expectancy and the Council area with the lowest life expectancy decreased by 0.2 years – from 7.5 years in 1996-1998 to 7.3 years in 2006-2008. Whereas, for women, the gap increased by 0.4 years – from 4.9 years to 5.3 years. For NHS Board areas the gap decreased for both men and women by 0.3 years;
- Among Council areas, the biggest rise in life expectancy was in West Lothian (4.0 years) for men and East Dunbartonshire (3.1 years) for women. The smallest rise in life expectancy was in Orkney (1.1 years) for men, and Moray (0.5 years) for women;

#### **Comparison with EU-27**

- Scottish men and women have among the lowest life expectancy at birth in Europe. Only the Eastern European states which joined the European Union (EU) on 1 May 2004 and 1 January 2007 have lower figures.
- Scottish men can expect to live slightly shorter lives (0.8 years) than the EU average. For Scottish women, life expectancy is 2.0 years lower than the EU average. For both genders the expectation of life is 4.0 to 4.5 years lower than the countries with the highest expectation of life.

## 1. Background

1.1 This paper summarises the Registrar General for Scotland's life expectancy figures for the period 2006-2008 for administrative areas within Scotland and compares these with results for 1996-1998. Life expectancy at birth for all people is presented in this report, although the analysis concentrates on male and female as in previous reports. It reports on 14 NHS Board areas only, and, unlike earlier reports (pre 2005-2007), does not include analysis of the former Argyll & Clyde NHS Board area. Figures for the old NHS Board areas are available on request for comparison purposes.

1.2 The results for 2006-2008, given in [Table 1](#), [Table 2](#) and [Table 3](#), have been ranked for ease of presentation. For Council areas, this means that "1" is the area with the highest life expectancy and "32" the lowest. Similarly, NHS Board areas are ranked 1 to 14.

## 2. Life Expectancy at Birth

2.1 The figures quoted in this publication are a three year average. They are produced by aggregating deaths and population data for the three year period. Three years of data are needed to provide large enough numbers to ensure that the figures published in this report are sufficiently robust.

2.2 The figures are all period life expectancies. Period life expectancies are calculated using age specific mortality rates for a given period with no allowance for any later actual or projected future changes in mortality after that period. This means that life expectancy at birth for a given time period and area is an estimate of the average number of years a new born baby would survive if he/she experienced the particular area's age specific mortality rates for that time period throughout his/her life. The figure reflects mortality among those living in the area in each period, rather than mortality among those born in each area. Life expectancy at birth is not simply the number of years a baby born in the area during the three year period is expected to live (although the term „can expect to live“ is used throughout this publication for ease of reading), both because death rates are likely to change in the future and because many of the newborns may live elsewhere for at least some part of their lives.

2.3 Life expectancy at birth is also not a guide to the remaining expectation of life at any given age. It reflects the fact that survival from a particular age depends only on mortality rates beyond that age, whereas survival from birth is based on mortality rates at every age. [Table 4](#) and [Table 5](#) show life expectancy at an "exact age". This is the average number of years those at this age would survive thereafter – if they experienced the particular area's age specific mortality rates for that time period throughout the remainder of their life. These extracts from period life tables (found in [Table 4](#) and [Table 5](#)) are constructed from the estimated population in 2006, 2007, 2008 and the total number of deaths registered in these years.

The column headed  $l_x$  shows the numbers who would survive to the exact age of  $x$ , out of 100,000 persons who, from birth were subject to the mortality probabilities indicated by the death records for 2006-2008. The column headed  $e_x$  shows the expectation of life – that is, the average number of years of life left to persons aged exactly  $x$  who are subject to the 2006-2008 mortality probabilities from age  $x$  onwards. For example, 71.1 per cent of the male population and 83.0 per cent of the female population of Glasgow City could be expected to survive to age 65. A male aged 65 living in Glasgow City could be expected to live on average another 13.8 years, and a female aged 65 could be expected to live on average another 17.4 years.

2.4 More information on the methodology is given via the links in [Section 4](#).

### 3. Discussion of Results

#### 3.1 The Scottish Picture: Changes over time

3.1.1 Life expectancy at birth provides a useful summary measure of mortality rates actually experienced over a given period. It also provides an objective means of comparing trends in mortality, over time, between areas of a country and with other countries. This is of particular use in monitoring and investigating health inequality issues across Scotland and in setting public health targets. One of the Government's current targets is to increase healthy life expectancy at birth in the most deprived areas. Healthy life expectancy is derived by combining estimates of life expectancy with data on self-assessed health (from surveys). Another related Government target is to reduce mortality from coronary heart disease among the under 75s in deprived areas. The incidence of mortality from coronary heart disease has an impact on estimates of life expectancy.

3.1.2 Figure 1 shows that the expectation of life at birth in Scotland has improved over the last 20 years or so. It has increased from 69.3 years for males born in the period 1981-1983, to 75.0 years for those born in 2006-2008, an increase of 5.7 years. For females, life expectancy has increased from 75.5 years for those born in the period 1981-1983, to 79.9 years for those born in 2006-2008, an increase of 4.4 years.

**Figure 1 Life expectancy at birth, Scotland, 1981-1983 to 2006-2008**

3.1.2 Figure 1 also shows that the gap between life expectancy at birth for men and women is slowly closing, dropping from 6.2 years in 1981-1983 to 4.9 years in 2006-2008.

3.1.3 Life expectancy figures for Scotland are also produced by the Office for National Statistics (ONS) using single years of age rather than grouped years. For more details see [Section 4.1](#).

## 3.2 International comparisons

3.2.1 Figure 2 shows that Scottish men and women have among the lowest expectation of life at birth in the EU-27<sup>1</sup>. The majority of countries with lower life expectancy than Scotland were Eastern European states which joined the EU on 1 May 2004 and 1 January 2007. For Scottish men, expectation of life is 0.8 years lower than the EU average. For women, life expectancy is 2.0 years lower. For both sexes, the expectation of life is 4.0 to 4.5 years lower than the EU countries with the highest life expectancy.

3.2.2 The average life expectancy at birth for the whole of the UK, based on the latest available figures (2005-2007), is 77.3 years for men and 81.7 years for women (see Figure 2). Only four Scottish Council areas have a higher male life expectancy than the UK average - East Renfrewshire, Aberdeenshire, Perth & Kinross and East Dunbartonshire. For females, only East Renfrewshire and East Dunbartonshire have a higher life expectancy than the UK average.

**Figure 2 Life Expectancy at birth, 2007, selected countries**

<sup>1</sup> EU-27 is an abbreviation for the European Union with 27 Member States: Austria, Belgium, Cyprus, Czech Republic, Denmark, Estonia, Finland, France, Germany, Greece, Hungary, Ireland, Italy, Latvia, Lithuania, Luxemburg, Malta, Netherlands, Poland, Portugal, Slovenia, Slovakia, Spain, Sweden, United Kingdom, Bulgaria and Romania.

### **3.3 Life Expectancy at Birth, 2006-2008, geographical variations**

3.3.1 [Table 1](#), [Table 2](#) and [Table 3](#) show life expectancy at birth in Scotland for 2006-2008 for Council and NHS Board areas.

3.3.2 For men, the Council area with the lowest life expectancy was Glasgow City (70.7 years), and the Council area with the highest life expectancy was East Dunbartonshire (78.0 years), 7.3 years more than Glasgow City.

3.3.3 For women, East Dunbartonshire also had the highest life expectancy (82.5 years), 5.3 years more than Glasgow City, the area with the lowest figure (77.2 years).

3.3.4 Of the NHS Board areas, the lowest life expectancy for men and women was in Greater Glasgow & Clyde (72.7 and 78.6 years respectively). The NHS Board area with the highest male life expectancy was Borders (77.1 years) and the highest female life expectancy was Shetland (81.5 years).

### **3.4 Life Expectancy at age 65, 2006-2008, geographical variations**

3.4.1 [Table 6](#) shows life expectancy at age 65 for Scotland and its administrative areas and has been ranked for ease of presentation. This shows that, for Scotland, men aged 65 could expect to live a further 16.3 years and women a further 18.9 years if mortality rates remain the same as they were in the period 2006-2008.

3.4.2 For men and women, the Council area with the lowest life expectancy at age 65 was Glasgow City (13.8 years and 17.4 years respectively). The Council area with the highest life expectancy at age 65 for men and women was Shetland (17.9 and 20.4 years respectively), 4.1 years for men and 3.0 years for women more than Glasgow City.

3.4.3 The NHS Board area with the lowest life expectancy at age 65 for men and women was Greater Glasgow & Clyde (15.0 and 18.1 years respectively). The NHS Board area with the highest life expectancy at age 65 for men and women was Shetland (17.9 years and 20.4 years respectively), this was 2.9 years for men and 2.3 years for women more than Greater Glasgow & Clyde.

### **3.5 Accuracy of Results**

3.5.1 Life expectancy at birth, like most statistics, is an estimate which is subject to a margin of error. The accuracy of the results can be indicated by calculating a confidence interval which provides a range of values within which the true underlying life expectancy would lie (with 95% probability).

3.5.2 The 95% confidence intervals for life expectancy at birth and at age 65 are given in [Table 7](#) and [Table 8](#), and are illustrated in [Figure 3](#), [Figure 4](#), [Figure 5](#) and [Figure 6](#) for Council and NHS Board areas within Scotland.

3.5.3 There is no simple “rule of thumb” for the size of confidence intervals, although it largely depends upon the size of the population: areas with small populations tend to have wider confidence intervals. It is also worth noting that life expectancy results in these areas can be affected by the random variation in the annual number of deaths. This means that the results can be erratic and vary from period to period. For example, in [Table 1](#), [Table 2](#) and [Table 3](#), changes in rank may simply be due to random variation from year to year in the population and number of deaths (particularly in the smaller areas

such as Orkney and Shetland) as opposed to a real change in the number of years one can expect to live.

3.5.4 More information about the methods used to calculate the standard errors and confidence intervals used in this report can be found in the ONS methodology paper “Life expectancy at birth: methodological options for small populations”. See [Section 4.2.4](#) for details of how to access this report.

**Figure 3 Life expectancy at birth, 95% confidence intervals for Council areas, 2006-2008 (Males and Females)**

**Figure 4 Life expectancy at birth, 95% confidence intervals for NHS Board areas, 2006-2008 (Males and Females)**

**Figure 5 Life expectancy at age 65, 95% confidence intervals for Council areas, 2006-2008 (Males and Females)**

**Figure 6 Life expectancy at age 65, 95% confidence intervals for NHS Board areas, 2006-2008 (Males and Females)**

### 3.6 Life expectancy at birth, comparisons between 1996-1998 and 2006-2008

3.6.1 In the ten years since 1996-1998 life expectancy at birth in Scotland has increased by 2.6 years for men (from 72.4 years to 75.0 years), and 1.9 years for women (from 78.1 years to 79.9 years). [Table 1](#), [Table 2](#) and [Table 3](#) show the highest and lowest ranking Council and NHS Board area for both periods. The tables also show the gap in life expectancy between men and women is closing, from 5.6 years in 1996-1998 to 4.9 years in 2006-2008.

3.6.2 For males, the gap between the Council area with the highest life expectancy and the Council area with the lowest life expectancy has decreased by 0.2 years – from 7.5 years in 1996-1998 to 7.3 years in 2006-2008. For women, the gap has increased by 0.4 years – from 4.9 years in 1996-1998 to 5.3 years in 2006-2008.

3.6.2 The maps in [Figure 7a](#) and [Figure 7b](#) and the charts in [Figure 7c](#) show the percentage change in life expectancy over the 10 year period for Council areas. For men, life expectancy increased the most in West Lothian – by 5.6 per cent (4.0 years), while Orkney had the smallest increase with 1.4 per cent (1.1 years). For females, life expectancy increased the most in East Dunbartonshire – by 3.8 per cent (3.1 years), and Moray had the lowest increase with 0.6 per cent (0.5 years).

3.6.3 The maps in [Figure 8a](#) and [Figure 8b](#) and the charts in [Figure 8c](#) show similar information for NHS Board areas. For men, Lothian had the largest increase with 4.6 per cent (3.4 years) and Orkney the smallest with 1.4 per cent (1.1 years). For women, Lothian also had the largest increase with 3.2 per cent (2.5 years) and Grampian the smallest with 1.2 per cent (0.9 years).

3.6.4 Over the 10 year period, the ranking of many Council and NHS Boards has changed ([Table 1](#), [Table 2](#) and [Table 3](#)). For men, West Lothian Council area has risen 11 places to 14<sup>th</sup> while Orkney has fallen 13 places to 24<sup>th</sup>. East Dunbartonshire has replaced East Renfrewshire as the Council area ranked number 1 for male life expectancy. For women, Edinburgh has risen 11 places to 6<sup>th</sup>, while Moray has fallen 16 places to 19<sup>th</sup>. East Dunbartonshire has replaced Aberdeenshire as the Council area ranked number 1 for female life expectancy.

3.6.5 Of the NHS Board areas, for men, Lothian and Highland have risen 4 places to 3<sup>rd</sup> and 5<sup>th</sup> respectively and Orkney has fallen 6 places to 11<sup>th</sup>. For women, Lothian has risen 7 places to 4<sup>th</sup> and Grampian and Dumfries & Galloway have fallen 5 places to 6<sup>th</sup> and 9<sup>th</sup> respectively. For men, Borders remains the NHS Board area ranked number 1 for life expectancy and for women, Shetland replaces Grampian as the NHS Board area ranked number 1 life expectancy.

3.6.6 When confidence intervals for the results are taken into account, many of the changes in the rankings over time are not exact, especially for areas with relatively small populations such as Orkney and Shetland. Confidence intervals for 1996-1998 are not presented here, but male and female figures are available from the Office for National Statistics (ONS) website through the following link:

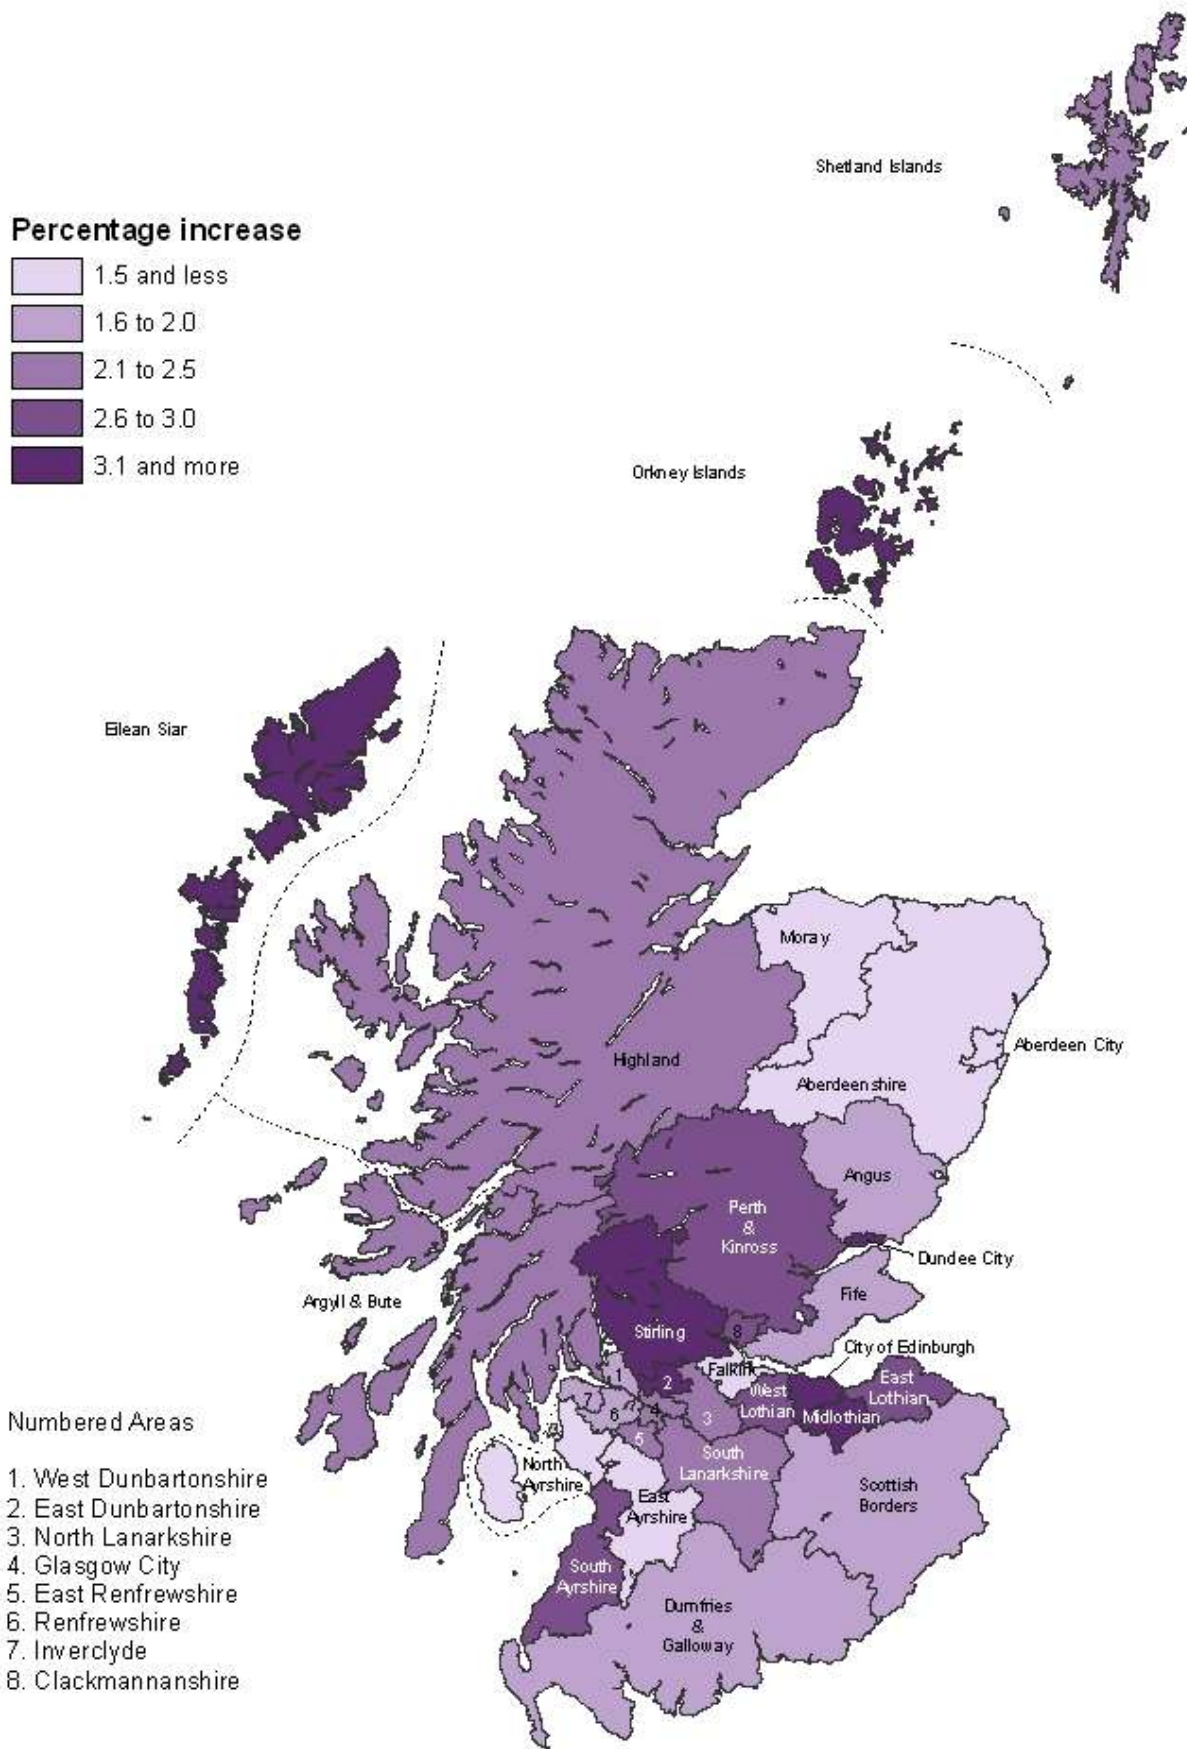

[http://www.statistics.gov.uk/downloads/theme\\_population/LE\\_Scotland\\_2007.xls](http://www.statistics.gov.uk/downloads/theme_population/LE_Scotland_2007.xls)

## 4. Further information

### 4.1 National Life Expectancy at Birth

4.1.1 The Office for National Statistics (ONS) produces national life tables for the UK and constituent countries, which give statistics on period expectation of life. Responsibility for the production of national life expectancy figures transferred to ONS from the Government Actuary's Department (GAD) on 31 January 2006.

4.1.2 Every ten years a set of graduated (smoothed) life tables for Scotland is published. They are available for the years 1930-1932 to 2000-2002 (excluding 1940-1942) from the ONS website:

<http://www.statistics.gov.uk/StatBase/Product.asp?vlnk=333>

and from the National Records of Scotland (NRS) website:

[www.nrscotland.gov.uk/statistics-and-data/statistics/statistics-by-theme/life-expectancy-at-scotland-level/index.html](http://www.nrscotland.gov.uk/statistics-and-data/statistics/statistics-by-theme/life-expectancy-at-scotland-level/index.html)

4.1.3 In addition, each year ungraduated interim life tables are produced for Scotland based on data for a period of three consecutive calendar years. They are also available via the web links listed above.

4.1.3 Because of the differences between complete (single year of age) and abridged (grouped years) life tables, the abridged Scotland level figures presented in this report may differ slightly from those published by ONS, which are complete. A detailed description of the standard methods and notation associated with the calculation of life expectancy by ONS (and previous to this – GAD) can be found on the GAD website:

[http://www.gad.gov.uk/Demography%20Data/Life%20Tables/Interim\\_life\\_tables.html](http://www.gad.gov.uk/Demography%20Data/Life%20Tables/Interim_life_tables.html)

4.1.4 Period life expectancies are worked out using the age-specific mortality rates for a given period (either a single year, or a run of years), with no allowance for any later actual or projected changes in mortality. Cohort life expectancies are worked out using age-specific mortality rates which allow for known or projected changes in mortality in later years. Period and cohort life expectancies using the 2006-based population projections mortality assumptions can be accessed from the ONS website at:

<http://www.statistics.gov.uk/StatBase/Product.asp?vlnk=15098>

4.1.5 ONS intends to publish Scotland-level ungraduated interim life tables for 2006-2008 in October 2009. Provisional figures for 2006-2008 are available in the Life Expectancy pages of the NRS website, within the 'Life Expectancy at Scotland Level' section:

[www.nrscotland.gov.uk/statistics-and-data/statistics-by-theme/life-expectancy/life-expectancy-at-scotland-level](http://www.nrscotland.gov.uk/statistics-and-data/statistics-by-theme/life-expectancy/life-expectancy-at-scotland-level)

## **4.2 Life Expectancy for Scottish Administrative Areas**

4.2.1 Previous publications dedicated to life expectancy produced by NRS are available from our website (now including life expectancy figures for special areas (Urban/Rural, Deprivation, and Community Health Partnership) within Scotland):

[www.nrscotland.gov.uk/statistics-and-data/statistics/statistics-by-theme/life-expectancy/life-expectancy-in-scottish-areas](http://www.nrscotland.gov.uk/statistics-and-data/statistics/statistics-by-theme/life-expectancy/life-expectancy-in-scottish-areas)

4.2.2 A further breakdown of Council area life expectancy has recently been added to the NRS website, which splits each Council by deprivation and may be of particular use in monitoring inequalities within a Council area.

[www.nrscotland.gov.uk/statistics-and-data/statistics/statistics-by-theme/life-expectancy/life-expectancy-in-scottish-areas/council-areas-by-deprivation/archive/2003-2007](http://www.nrscotland.gov.uk/statistics-and-data/statistics/statistics-by-theme/life-expectancy/life-expectancy-in-scottish-areas/council-areas-by-deprivation/archive/2003-2007)

4.2.3 Life expectancy tables with 95% confidence intervals for Scottish Council and NHS Board areas from 1991-1993 to 2005-2007 are available on the National Statistics website, published in September 2008, through the following link:

<http://www.statistics.gov.uk/StatBase/Product.asp?vlnk=8841&Pos=&ColRank=1&Rank=272>

This webpage also contains life expectancy tables for local and health authorities in England, Wales and Northern Ireland. Earlier life expectancy tables for Scottish Council and NHS Board areas, back to 1981-1983 are available on the NRS website in the form of abridged life tables, through the following link:

[www.nrscotland.gov.uk/statistics-and-data/statistics/statistics-by-theme/life-expectancy/life-expectancy-in-scottish-areas/archive/admin-area](http://www.nrscotland.gov.uk/statistics-and-data/statistics/statistics-by-theme/life-expectancy/life-expectancy-in-scottish-areas/archive/admin-area)

4.2.4 A report which details the research undertaken by ONS to compare methodologies for calculating of life expectancy figures and confidence intervals can also be found on the National Statistics website:

[http://www.statistics.gov.uk/downloads/theme\\_other/GSSMethodology\\_No\\_33.pdf](http://www.statistics.gov.uk/downloads/theme_other/GSSMethodology_No_33.pdf)

## **4.3 Healthy Life Expectancy**

4.3.1 Healthy Life Expectancy (HLE) is defined as the number of years people can expect to live in good health. The difference between life expectancy and HLE indicates the length of time people can expect to spend in poor health. Information on HLE in Scotland was first published in March 2004 by the Information and Statistics Division (ISD) of the NHS in Scotland. In June 2008, ISD published HLE estimates by NHS Board and community health partnership area, as part of the Scottish Health and Wellbeing Profiles. These data and further information on HLE are available on the Scottish Public Health Observatory (ScotPHO) website at:

<http://www.scotpho.org.uk/hle>

## 4.4 Other data available from the National Records of Scotland

4.4.1 Estimates of the resident population of Scotland are prepared by NRS each year. These are available by sex and single year of age for Council and NHS Board areas, together with historical data. Information is also available on a wide range of related topics such as small area population estimates, population projections, migration estimates and data from the 2001 and earlier Censuses. For further information please contact:

## 5. Notes and Definitions

5.1 Following the dissolution of Argyll & Clyde NHS Board on 31<sup>st</sup> March 2006, its area has been split between Greater Glasgow and Highland NHS Boards and the former has been renamed Greater Glasgow & Clyde.

5.2 The composition of the NHS Board areas in terms of Council areas is summarised in the table below.

<b>NHS Board area</b>	<b>Council area</b>
<b>Ayrshire &amp; Arran</b>	East Ayrshire, North Ayrshire, South Ayrshire
<b>Borders</b>	Scottish Borders
<b>Dumfries &amp; Galloway</b>	Dumfries & Galloway
<b>Fife</b>	Fife (part)
<b>Forth Valley</b>	Clackmannanshire, Falkirk (part), Stirling (part), Perth & Kinross (part)
<b>Grampian</b>	Aberdeen City, Aberdeenshire, Moray
<b>Greater Glasgow &amp; Clyde</b> <sup>1</sup>	East Dunbartonshire, East Renfrewshire, Glasgow City, Inverclyde, North Lanarkshire (part), Renfrewshire, South Lanarkshire (part), Stirling (part), West Dunbartonshire
<b>Highland</b> <sup>1</sup>	Argyll & Bute, Highland
<b>Lanarkshire</b>	North Lanarkshire (part), South Lanarkshire (part), West Lothian (part), Falkirk (part)
<b>Lothian</b>	East Lothian, City of Edinburgh, Midlothian, West Lothian (part), Falkirk (part)
<b>Orkney</b>	Orkney Islands
<b>Shetland</b>	Shetland Islands
<b>Tayside</b>	Angus, Dundee City, Perth & Kinross (part), Fife (part)
<b>Western Isles</b>	Eilean Siar

<sup>1</sup> New Board areas including parts of former Argyll & Clyde NHS Board.

Note : This abridged life table is constructed from the estimated population in 2006, 2007 and 2008 and the total number of deaths registered in these years. The column headed  $l_x$  shows the numbers who would survive to the exact age of x, out of 100,000 persons who, from birth, were subject to the mortality probabilities indicated by the death records for 2006-2008. Column  $e_x^o$  shows the expectation of life, that is, the average number of years of life left to persons aged exactly x who are subject to the 2006-2008 mortality probabilities from age x onwards.

**Table 5 Abridged life table, by sex, age and NHS Board area, Scotland 2006-2008**

Note : This abridged life table is constructed from the estimated population in 2006, 2007 and 2008 and the total number of deaths registered in these years. The column headed  $l_x$  shows the numbers who would survive to the exact age of x, out of 100,000 persons who, from birth, were subject to the mortality probabilities indicated by the death records for 2006-2008. Column  $e_x^o$  shows the expectation of life, that is, the average number of years of life left to persons aged exactly x who are subject to the 2006-2008 mortality probabilities from age x onwards.

## 6. Notes on statistical publications

### National Statistics

This is a National Statistics publication. It has been produced to the high professional standards set out in the UK Statistics Authority Code of Practice for Official Statistics (<http://www.statisticsauthority.gov.uk/assessment/code-of-practice/index.html>). These statistics undergo regular quality assurance reviews to ensure that they meet customer needs. They are produced free from any political interference.

### Enquiries

Enquiries about this publication should be addressed to:

Statistics Customer Services,  
National Records of Scotland,  
Ladywell House,  
Edinburgh,  
EH12 7TF.

Telephone: (0131) 314 4299

E-mail: [customer@gro-scotland.gsi.gov.uk](mailto:customer@gro-scotland.gsi.gov.uk)

### National Records of Scotland

The National Records of Scotland (NRS) is the department of the devolved Scottish Administration responsible for the registration of births, marriages, civil partnerships, deaths, divorces and adoptions in Scotland. We are responsible for the Census of Population in Scotland which we use, with other sources of information, to produce population and household statistics. We make available important information for family history. The NRS website is [www.nrscotland.gov.uk](http://www.nrscotland.gov.uk).

Our aim is to provide relevant and reliable information, analysis and advice that meet the needs of government, business and the people of Scotland.

Further detailed statistics produced by NRS are available from the Statistics Section on the NRS website ([www.nrscotland.gov.uk/statistics-and-data/statistics](http://www.nrscotland.gov.uk/statistics-and-data/statistics)). Statistics from the 2001 Census are on Scotland's Census Results On-Line website (<http://www.scrol.gov.uk>) and on the Census section of the NRS website ([www.nrscotland.gov.uk/statistics-and-data/census](http://www.nrscotland.gov.uk/statistics-and-data/census)).

Information about future publications is provided on the NRS website ([www.nrscotland.gov.uk/statistics-and-data/future-publications](http://www.nrscotland.gov.uk/statistics-and-data/future-publications)). If you would like to receive notification of forthcoming statistical publications, you can register your interest on the Scottish Government ScotStat website at <http://www.scotland.gov.uk/scotstat>.

### Comments and complaints

If you are not satisfied with our service, please write to Kirsty MacLachlan, Head of Demography Division, National Records of Scotland, Room 1/2/7, Ladywell House, Ladywell Road, Edinburgh EH12 7TF. Telephone: (0131) 314 4242, E-mail: [kirsty.maclachlan@gro-scotland.gsi.gov.uk](mailto:kirsty.maclachlan@gro-scotland.gsi.gov.uk).

We also welcome any comments or suggestion that would help us to improve our standards of service.
