

## **USING AND IMPROVING POPULATION AND HOUSEHOLD STATISTICS**

**Friday 30<sup>th</sup> October 2009**

**9:15am to 4:30pm**

**Victoria Quay, Edinburgh**

**Conference Room 1**

The General Register Office for Scotland (GROS) is keen to ensure that the statistics it produces are relevant and meet users needs. This event provides an opportunity for users and providers of statistics to get together and discuss potential improvements.

This meeting brings together a range of speakers to present the latest developments, and to gather views to shape the priorities of the demography division of GROS.

Among the topics covered will be:

- Trends and projections in mortality
- Changes in registration practices
- Analyses within local authorities
- Development and opportunities in data matching and use of administration sources
- Revised indicators of multiple deprivation
- The latest population projections results
- Update on the census

A programme is shown below.

This event is free.
